

The eClose Advantage with SimpleNexus

Combine integrated eClose functionality with SimpleNexus' leading digital mortgage platform for more efficient workflows, increased cost savings, and a more convenient borrower experience.

Uniting Stakeholders. Improving Collaboration.

Optimal Customer Experience

A single-platform experience ensures borrowers enjoy the ease of access without needing to create additional sign-on credentials. Automatic status updates and instant chat tools provide the transparency and guidance customers need to navigate the closing process with confidence.

Closing Document Accuracy and Simplification

As Lenders and Settlement Agents collaborate on closing loans, SimpleNexus makes life easier by maintaining a single set of Closing Documents throughout the whole process. Documents are redrawn frequently and SimpleNexus helps with automated workflow which ensures that Settlement Agents and Borrowers are always working with the most recent and accurate documents.

Efficient Workflows for Closers & Post Closers

The SimpleNexus eClose solution enables lending teams to easily manage closings (wet, hybrid) using a single platform with direct LOS integration for added workflow efficiency without disruption to existing processes. Closers and post closers are automatically notified when transaction steps are completed by the title agent or borrower.

eClose

Better Features for a Better eClose

Purchase & Refi Compatibility

eClose with SimpleNexus offers support for purchase and refinance scenarios. Lenders enjoy the added flexibility of a single closing solution for both transaction types.

Instant Chat

Stay connected with borrowers through integrated instant messaging. Communication is automatically logged and saved for added compliance convenience.

Mobile eSigning

Integrated mobile eSign capabilities plus support for responsive web gives lenders cross-channel feature parity to deliver added borrower convenience and time savings.

Security & Uptime Availability

SimpleNexus utilizes geofencing, IP-logging, SOC II, regular PEN tests, full redundancy for a more secure and reliable full platform solution boasting 99.9% uptime.

Multiple Partner Integrations

We partner with all the leading industry eClose technology providers to deliver a comprehensive solution coupled with ease of use.

“ This system is
integrated to all of
our other software
systems - making
things seamless.”
